Question 1**Key**

1. Which of the following represents fifteen tens?

- A) 15
-  B) 150
- C) 1,500
- D) 1,510

**Content Area:** *Numbers and Numeration*

## **Content Area**

### ***Numbers and Numeration***

This question was classified in the numbers and numeration content area. This content area deals with the ways numbers are used, processed, or written. Knowledge and understanding of numeration and number concepts are assessed for whole numbers, common fractions, decimal fractions, integers, and percents. Considerable emphasis is placed on operations. Number properties and order relations are also included. Questions include typical one- and two-step application problems, nonroutine problems, and consumer problems. There is more emphasis on numbers and numeration at ages 9 and 13 than at age 17.
