

End-of-Grade Reading Comprehension and Mathematics Number of Items and Total Test Time (Minutes)

Grades 6–7

The following chart provides the number of test items, the total test time, and the maximum time allowed for the North Carolina End-of-Grade Reading Comprehension and Mathematics Tests at Grades 6–7. The total test time does not include time for the test administrator to read general instructions to students, for students to code the background information and student survey, or for students to take scheduled breaks, when appropriate.

Note: For the end-of-grade reading comprehension and mathematics tests at grades 6–7, the time stated is the time that the North Carolina Department of Public Instruction estimates that it will take for approximately 95% of the tested students to complete the tests. The NCDPI requires that all students be allowed ample opportunity to complete the tests. As long as the students are engaged and working and the maximum time allowed has not been reached, students must be given time to complete the tests. At the school level, provisions must be made for students who will need time beyond that scheduled to complete the tests.
