

## 2017 Cohort Graduation Rate

Since 2006, the first year the state reported a four-year cohort graduation rate, the percentage of students graduating from high school in four years or less has risen 18.2 percentage points – from 68.3 percent to 86.5 percent.

### Background Information

The rules for calculating the cohort graduation rate meet federal requirements and the National Governor’s Association’s definition as “the number of graduates divided by the number of students who entered ninth grade in 2013–14, plus any incoming students and minus any students who leave North Carolina in subsequent years.”

Results of the 2016–17 cohort graduation rate results are presented online at <http://www.ncpublicschools.org/accountability/reporting/cohortgradrate>. The graduation results are available by individual school and school district (LEA). There are also links to supplementary documents that explain the calculations used for the four-year and five-year cohort graduation rates. A longitudinal cohort graduation rate spreadsheet, with the first year the state reported a four-year cohort graduation rate to the most current results, is also available on the site.
