Acknowledgements

The development of a comprehensive document that contains student and school system performance on grade 3 pretests, end-of-grade tests, high school comprehensive tests, and end-of-course tests requires the skill and efforts of many individuals. We would like to thank Mildred Bazemore, Monica Geary, and Ken Barbour for their assistance in preparing all phases of this publication; George Stubblefield and Betty Marsh for supplying the statistical data; Karen Eller, for creating the tables and figures, and Andrea Barefoot, Anthony Wells, Kathleen Snyder, and Katie McCann for verifying accuracy of the numbers and editing.

Abstract

The 1998-99 North Carolina State Testing Results Grade 3 Pretest, End-of-Grade, High School Comprehensive, and End-of Course Multiple-Choice Tests

Background

- Initially implemented during the 1996-97 school year, the North Carolina Pretest-Grade 3 is a multiple-choice reading and mathematics test administered to students during the first three weeks of the third grade. Student scores on this test are used to measure student growth in performance when compared to the end-of-grade test results at the end of the third grade year in the areas of reading and mathematics. The pretest at grade 3 measures the knowledge and skills specified for grade 2 from the reading and mathematics goals and objectives of the North Carolina *Standard Course of Study*. The pretest was administered to more than 101,000 students in the beginning of the 1998-99 school year.
- Beginning in the 1992-93 school year, the North Carolina State Board of Education authorized administration of North Carolina-developed end-of-grade tests aligned with the *Standard Course of Study*. These state-normed tests were administered to over 569,000 students in grades 3 through 8 during the last three weeks of the 1998-99 school year.
- The North Carolina High School Comprehensive Test in reading and mathematics was first administered in 1997-98 to all students in grade 10. It assesses the English Language Arts and Mathematics competencies the typical student should master by the end of grade 10. The test is used to measure student growth in achievement in reading and mathematics since completion of grade 8. It was administered to more than 75,000 students in the last three weeks of April 1999.
- End-of-course tests measure achievement on curricular goals and objectives with an emphasis on higher-order thinking skills. Multiple choice tests were administered in Algebra I; Algebra II; Biology; Chemistry; Economic, Legal and Political Systems (ELP); English I; Geometry; Physical Science; Physics and U.S. History to over 631,000 students within the last two weeks of instruction during the 1998-99 school year.

Grade 3 Pretest Findings

- *Achievement Level III or Above*. These results show that 67.4 percent of students entering third grade scored at or above Achievement Level III on the *reading* pretest while 74.7 percent scored at or above Achievement Level III on the *mathematics* pretest. The percent of students scoring at or above Achievement Level III on the grade 3 reading pretest in 1998-99 increased 2.1 percentage points from 1997-98. The percent of students scoring at or above Achievement Level III on the grade 3 mathematics pretest in 1998-99 increased 3.2

percentage points from 1997-98.

- Mean Scale Scores. In these data, the grade 3 reading pretest mean scale score increased from 137.7 in 1997-98 to 138.1 in 1998-99. The grade 3 mathematics pretest mean scale score increased from 130.2 in 1997-98 to 130.9 in 1998-99.
- Gender. A higher percentage of females than males performed at Achievement Level III or above in the grade 3 reading pretest and the grade 3 mathematics pretest.
- Ethnicity. Disparities in performance among subgroups were noted in these results. In *reading*, the American Indian (53.7%), Black (53.8%), and Hispanic (54.1%) subgroups had lower percentages performing at Achievement Level III or above than the Multi-Racial (70.5%), Asian (73.0%) and White (74.8%) subgroups in these data. In *mathematics*, the Black (60.8%), American Indian (61.3%), and Hispanic (64.8%) subgroups had lower percentages performing at Achievement Level III or above than the Multi-Racial (77.2%), White (82.1%), and Asian (83.8%) subgroups. In comparison to 1997-98, all subgroups have higher percentages of students performing at Achievement Level III or above in reading and mathematics in 1998-99, except for the Asian subgroup which decreased slightly.

End-of-Grade Findings

- Achievement Level III or Above. Data from 1998-99 suggest the percentage of students in grades 3-8 performing at Achievement Level III and above in both reading and mathematics continues to grow, from 52.9 percent in 1992-93 to an estimated 69.1 percent in 1998-99.
- Mean Scale Scores. In these data, mean scale scores for reading increased at least slightly from 1997-98 to 1998-99 at every grade level except grade 5 (remained the same). Mean scale scores for mathematics increased somewhat at every grade level. On average, student performance increased on end-of-grade testing every year.
- Gender. In 1998-99, a higher percentage of females (72.1%) than males (66.2%) scored at or above Achievement Level III in both reading and mathematics in grades 3-8 combined. Although the number of females and males performing at Achievement Level III continues to rise across the years, the females consistently outperform males in a trend established with the 1992-93 school year's testing.
- Ethnicity. Disparities in performance were present among subgroups. The Black (48.5%), Hispanic (55.5%), and American Indian (55.6%) subgroups had lower percentages performing at Achievement Level III or above in both reading and mathematics in grades 3-8 combined than the Multi-Racial (70.4%), Asian (75.0%) and White (79.2%) subgroups in these data. However, each subgroup had a higher percentage of students scoring at Achievement Level III or above than in 1997-98.

High School Comprehensive Findings

- Achievement Level III or Above. These results show that 61.1 percent of students taking the high school comprehensive test scored at or above Achievement Level III in *reading* while 61.4 percent scored at or above Achievement Level III in *mathematics*. The percent of students scoring at or above Achievement Level III on the high school comprehensive test in reading in 1998-99 increased 5.5 percentage points from 1997-98. The percent of students scoring at or above Achievement Level III on the high school comprehensive test in mathematics in 1998-99 increased 6.5 percentage points from 1997-98.
- Mean Scale Scores. In these data, the high school comprehensive mean scale score in *reading* increased from 163.3 in 1997-98 to 164.8 in 1998-99. The high school comprehensive mean scale score in *mathematics* increased from 174.3 in 1997-98 to 176.3 in 1998-99.
- Gender. A higher percentage of females than males performed at Achievement Level III or above in reading and mathematics. The percent of females at Achievement Level III or above in *reading* increased from 62.0 in 1997-98 to 65.8 in 1998-99. The percent of males at Achievement Level III or above in *reading* increased from 49.0 in 1997-98 to 56.3 in 1998-99. The percent of females at Achievement Level III or above in *mathematics* increased from 57.1 in 1997-98 to 62.4 in 1998-99. The percent of males at Achievement Level III or above in *mathematics* increased from 52.6 in 1997-98 to 60.4 in 1998-99.
- Ethnicity. Disparities in performance among subgroups were noted in these results. In *reading*, the Black (38.4%), American Indian (42.8%), and Hispanic (48.5%) subgroups had lower percentages performing at Achievement Level III or above than the Asian (60.2%), Multi-Racial (65.8%), and White (71.1%) subgroups. In *mathematics*, the Black (36.8%), American Indian (44.9%), and Hispanic (50.2%) subgroups had lower percentages performing at Achievement Level III or above than the Multi-Racial (60.5%), Asian (70.7%), and White (71.9%) subgroups. In comparison to 1997-98, all subgroup performance increased with the exception of the Asian subgroup performance in mathematics. In 1997-98, 73.3% of Asian students performed at Achievement Level III or above in mathematics in comparison to 70.7% in 1998-99.

End-of-Course Findings

- During the 1997-98 school year, school systems had the option of administering the end-of-course tests of Algebra II, Chemistry, Geometry, Physical Science, and Physics. Although statewide administrations of these tests were mandated for the 1998-99 school year, comparisons across years are not available.
- Achievement Level III or Above. Student performance at Achievement Level III or above in end-of-course tests increased in four of the five

tests reported to the State in 1997-98. The comparison of results from 1997-98 to 1998-99 is as follows: Algebra I increased from 61.6% to 65.4%; Biology decreased from 59.0% to 57.7%; ELP increased from 66.9% to 67.4%; English I increased from 60.7% to 64.6%; and U.S. History increased from 49.6% to 51.0%.

- Mean Scale Scores. The mean scale score for Algebra I is 58.0; for Biology, 56.0; for ELP, 55.0; for English I, 54.5; and for U.S. History, 56.6. The mean scale scores from 1997-98 to 1998-99 increased with the exception of Biology. In 1997-98, the mean scale score for 78,804 students was 56.2. In 1998-99 the mean scale score for 76,872 students was 56.0.
- Gender. A higher percentage of females than males performed at Achievement Level III or above in Algebra I and English I. More males than females scored at or above Achievement Level III on Algebra II, Biology, Chemistry, ELP, Geometry, Physical Science, Physics, and U.S. History end-of-course testing.
- Ethnicity. Performance among subgroups varied while tending to be relatively consistent across subjects in these data. The Asian subgroup had the highest performance on Algebra I, Algebra II, Chemistry, and Physics. On Biology, ELP, English I, Geometry, Physical Science, and U.S. History, the White subgroup had the largest percentage scoring at Achievement Level III or above. On most of the end-of-course tests the Hispanic, American Indian, and Black subgroups had the lowest percentages of students performing at or above Achievement Level III. Generally, the Hispanic subgroup had somewhat better performance than the American Indian subgroup, which in turn had somewhat better performance than the Black subgroup.
- Among students meeting the limited English proficiency requirement, the highest average performance was on Physics, with 68.8 percent scoring at Achievement Level III or above. Performance on Algebra I was very similar, with 68.3 percent scoring Level III or above. Algebra II (59.3%), Chemistry (46.0%), Geometry (39.2%), U.S. History (26.2%), ELP (25.0%), Biology (24.3%), English I (23.5%) and Physical Science (23.0%) test results showed lower percentages of these students scoring at Achievement Level III or above.

Introduction

The 1998-99 North Carolina State Testing Results document provides information on student performance at the state, regional, and school system levels on the following multiple-choice tests administered as components of the 1998-99 North Carolina Testing Program: grade 3 pretest (reading and mathematics), end-of-grade tests (grades 3-8 in reading and mathematics), high school comprehensive test (grade 10 in reading and mathematics), and end-of-course tests (high school subjects). The figures and tables in this document were generated using student test data from the grade 3 pretest fall 1998 test administration; the end-of-grade spring 1999 test administration; the high school comprehensive spring 1999 test administration; and the end-of-course summer 1998, fall 1998, and spring 1999 test administrations. These test data were generated from raw data files provided by each local education agency (LEA), including charter schools. Some minor duplication for end-of-course test data can occur when students re-take courses and, therefore, are required to re-take the test. Test data were reconciled with school systems' test data through October 15, 1999 (the cutoff for the 1998-99 school year reporting.)

The general focus of the *State Testing Results* is on student *performance* on multiple-choice tests administered during the 1998-99 school year. However, many data are reported across years in order to show gains in student performance. Student *performance* and *growth* are the key components of the State Board of Education's ABCs of Public Education school-level accountability program. School-level accountability results are found in the *State Report Card*, which is published annually.

State and system-level results contained within this document may be used to make grade-to-grade, subject-to-subject, and year-to-year comparisons. In addition, comparisons of developmental scale scores of cohort groups as they move through grades 3-8 in reading and mathematics can be made. A variety of statistical descriptions, test scores, and formats have been used to present the aggregate student data. Mean scores, the percent of students identified at the four achievement levels, and the percent of students identified as Achievement Level III or above on the grade 3 pretest, end-of-grade tests in grades 3-8, the high school comprehensive test, or end-of-course tests are also presented. Information in this document may be used as a reference for school systems and schools interested in making similar comparisons, analyses, and reports.

In addition to the summary statistics, this document contains disaggregated test results for subgroups for the grade 3 pretest, end-of-grade tests, high school comprehensive test, and end-of-course multiple-choice tests. The state-level goal summary reports serve as a curriculum reference of student performance on the curriculum goals across grades and subjects. These results represent average student performance on the curriculum competencies measured in the revised North Carolina *Standard Course of Study*. The frequency distributions provide state-level summary statistics for 1998-99.

End-of-course testing began as a part of the North Carolina Testing Program in 1985-86 with the first Algebra I administration. Other high school subject tests were added over time until 1994-95 when the program included eleven tests: Algebra I; Algebra II; Biology; Chemistry; Economic, Legal, and Political Systems (ELP); English I; English II; Geometry; Physical Science; Physics; and U.S. History. In 1995-96 under the ABCs plan, end-of-course tests were reduced to include Algebra I, Biology, ELP, English I, and U.S. History. For the 1998-99 school year, the following ten end-of-course tests were mandated: Algebra I; Algebra II;

Biology; Chemistry; Economic, Legal, and Political Systems (ELP); English I; Geometry; Physical Science; Physics; and U.S. History.

End-of-grade testing was implemented initially in 1992-93 when more challenging assessment strategies replaced the California Achievement Tests (1978-92). During the 1997-98 school year, end-of-grade tests administered as a component of the statewide accountability program included reading and mathematics multiple-choice tests in grades 3 through 8.

The administration of the North Carolina Pretest-Grade 3 began in 1996-97. The High School Comprehensive Test began as a part of the North Carolina Testing Program in 1997-98.

The purpose of this publication is to provide a longitudinal, comprehensive compendium of test results from grade 3 pretest, end-of-grade tests in grades 3-8, high school comprehensive test, and end-of-course multiple-choice tests from 1991 to 1999 with a focus on reports of the 1998-99 school year performance. As the public schools of North Carolina continue to implement the ABCs of public education, the *State Testing Results* documents student performance and provides the reader an opportunity to develop an overall perspective on absolute student achievement in North Carolina.

**Figure 1. 1996-97 to 1998-99 Grade 3 Pretest Multiple-Choice Results
Percent of Students at Each Achievement Level in Reading**

**Figure 14. 1997-98 to 1998-99 North Carolina High School Comprehensive Multiple-Choice Test Results
Percent of Students at Each Achievement Level in Mathematics**

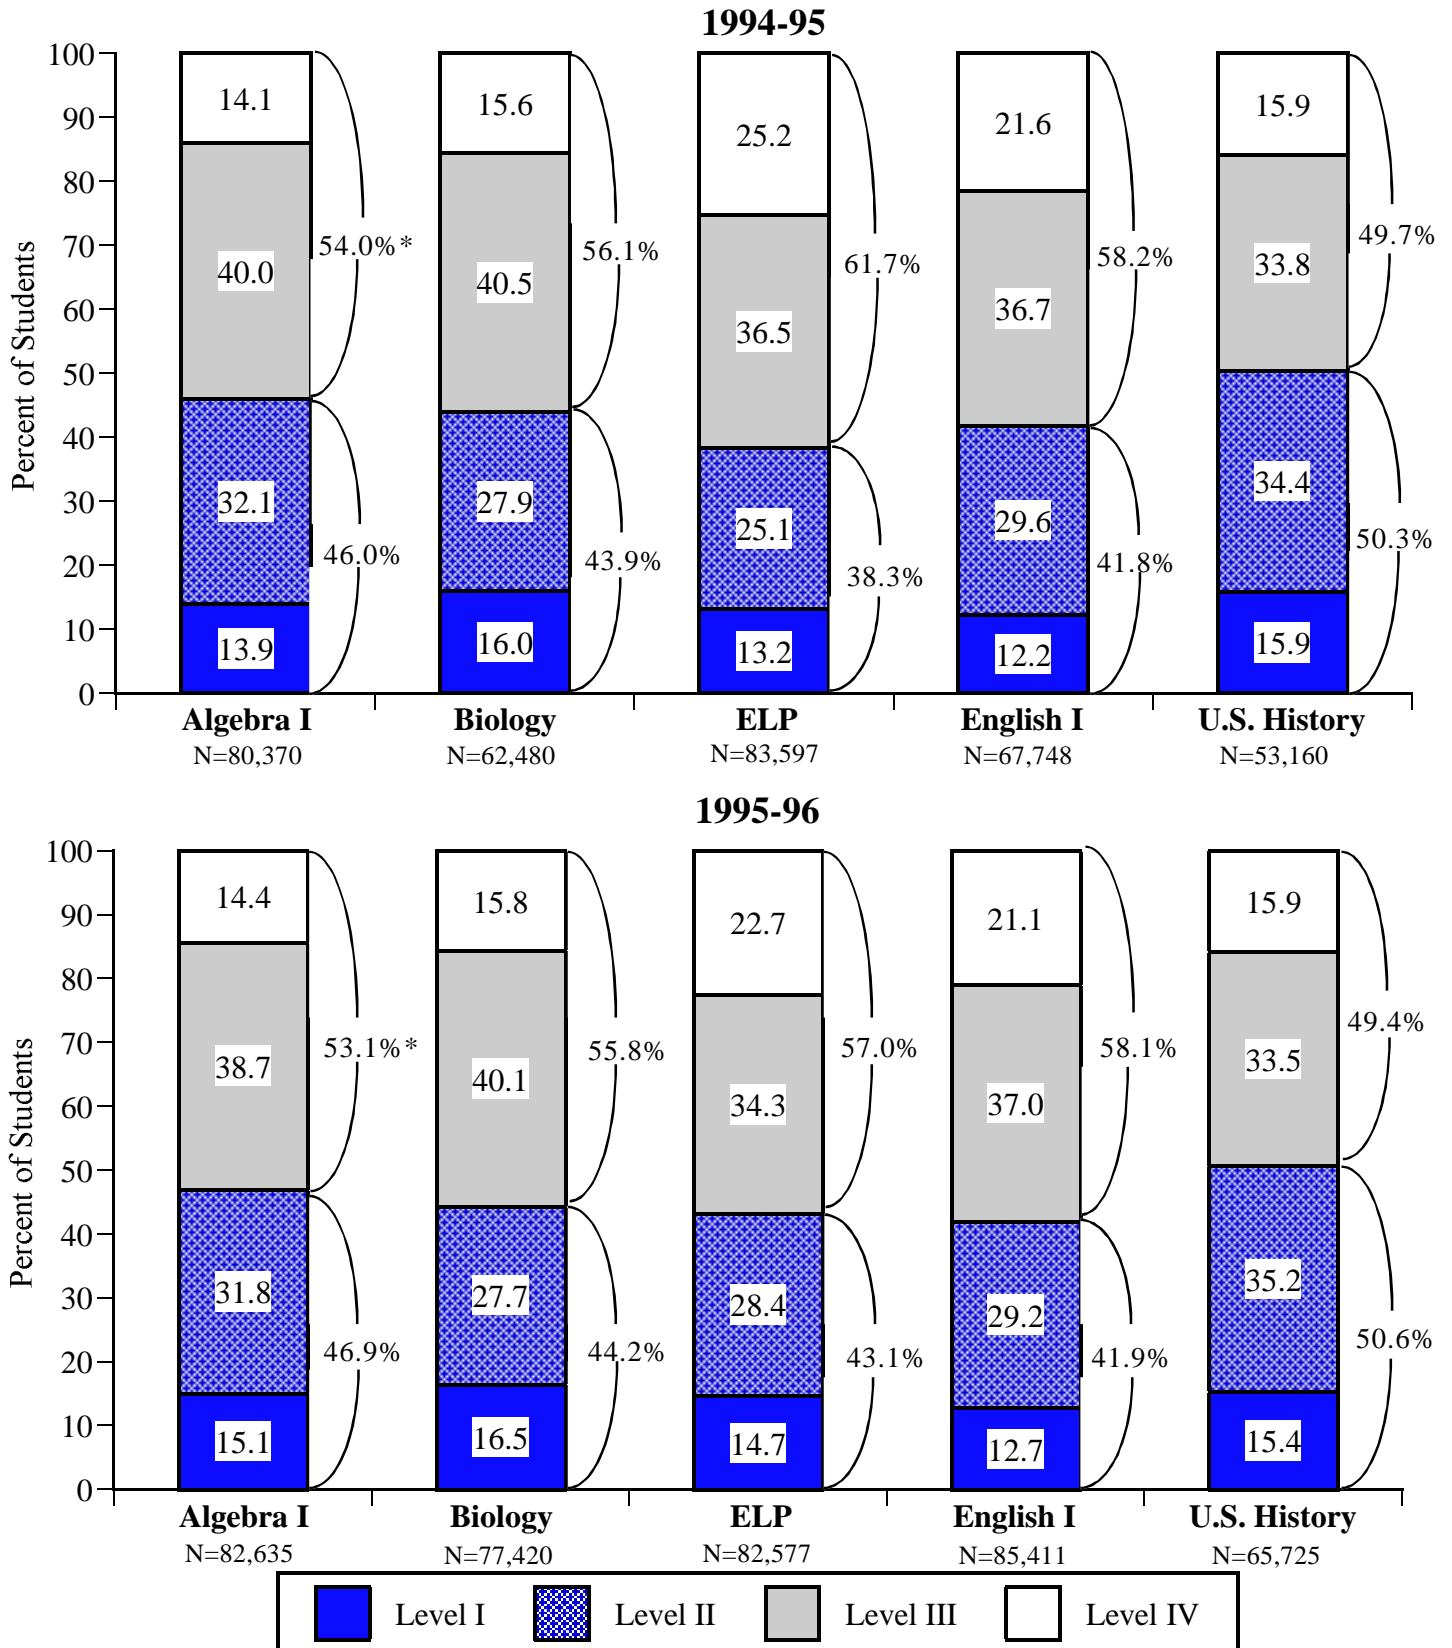

Notes: Due to rounding, data for some years may not add to 100%.

*Level I/II and Level III/IV percents are calculated based on actual N-counts and are not the sum of each percent.

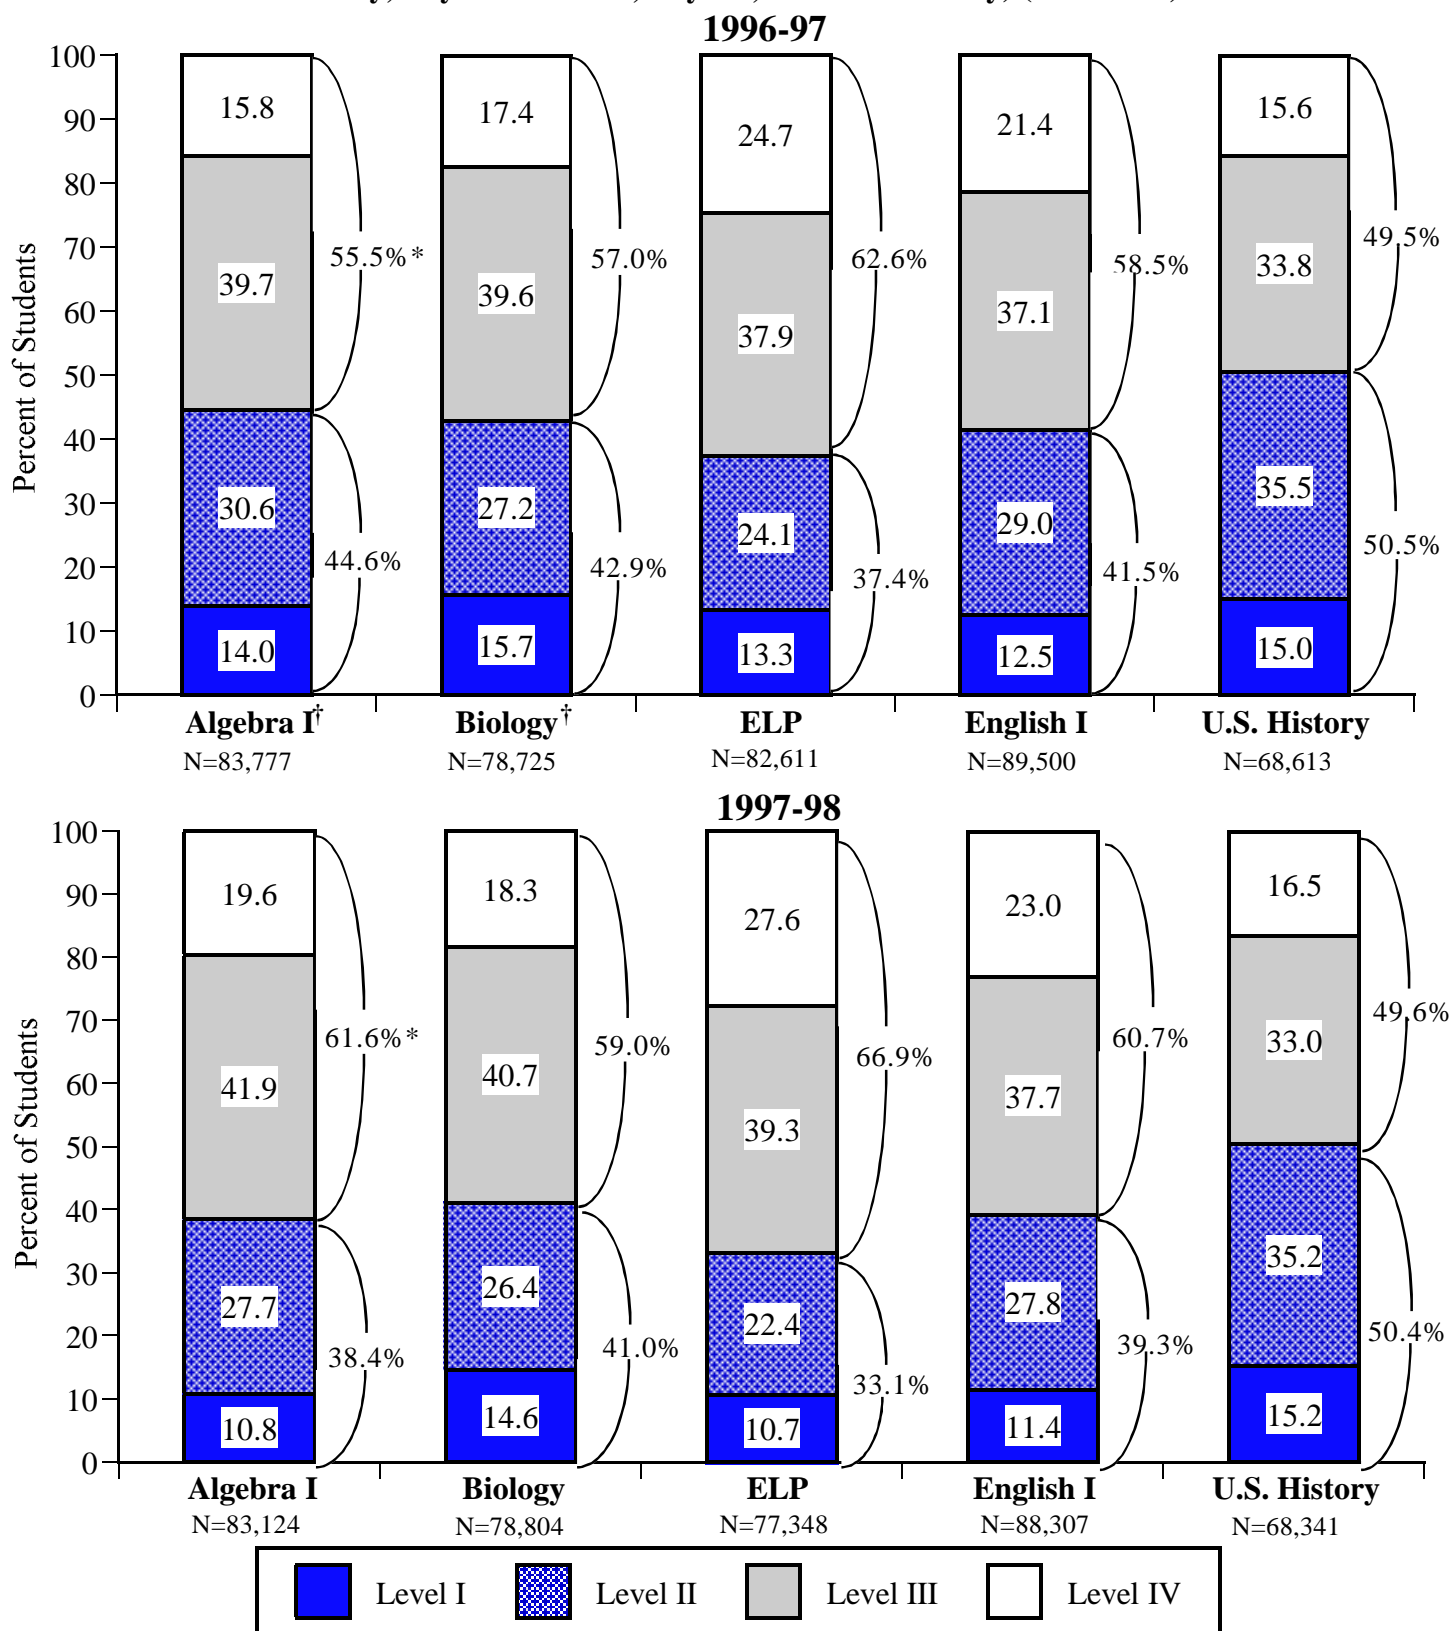

Data received from LEAs after October 15, 1999 are not included in this figure.

Figure 15. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results
Percent of Students at Each Achievement Level in the Ten Core Courses**
 (Algebra I, Algebra II, Biology, Chemistry, ELP, English I,
 Geometry, Physical Science, Physics, and U.S. History)

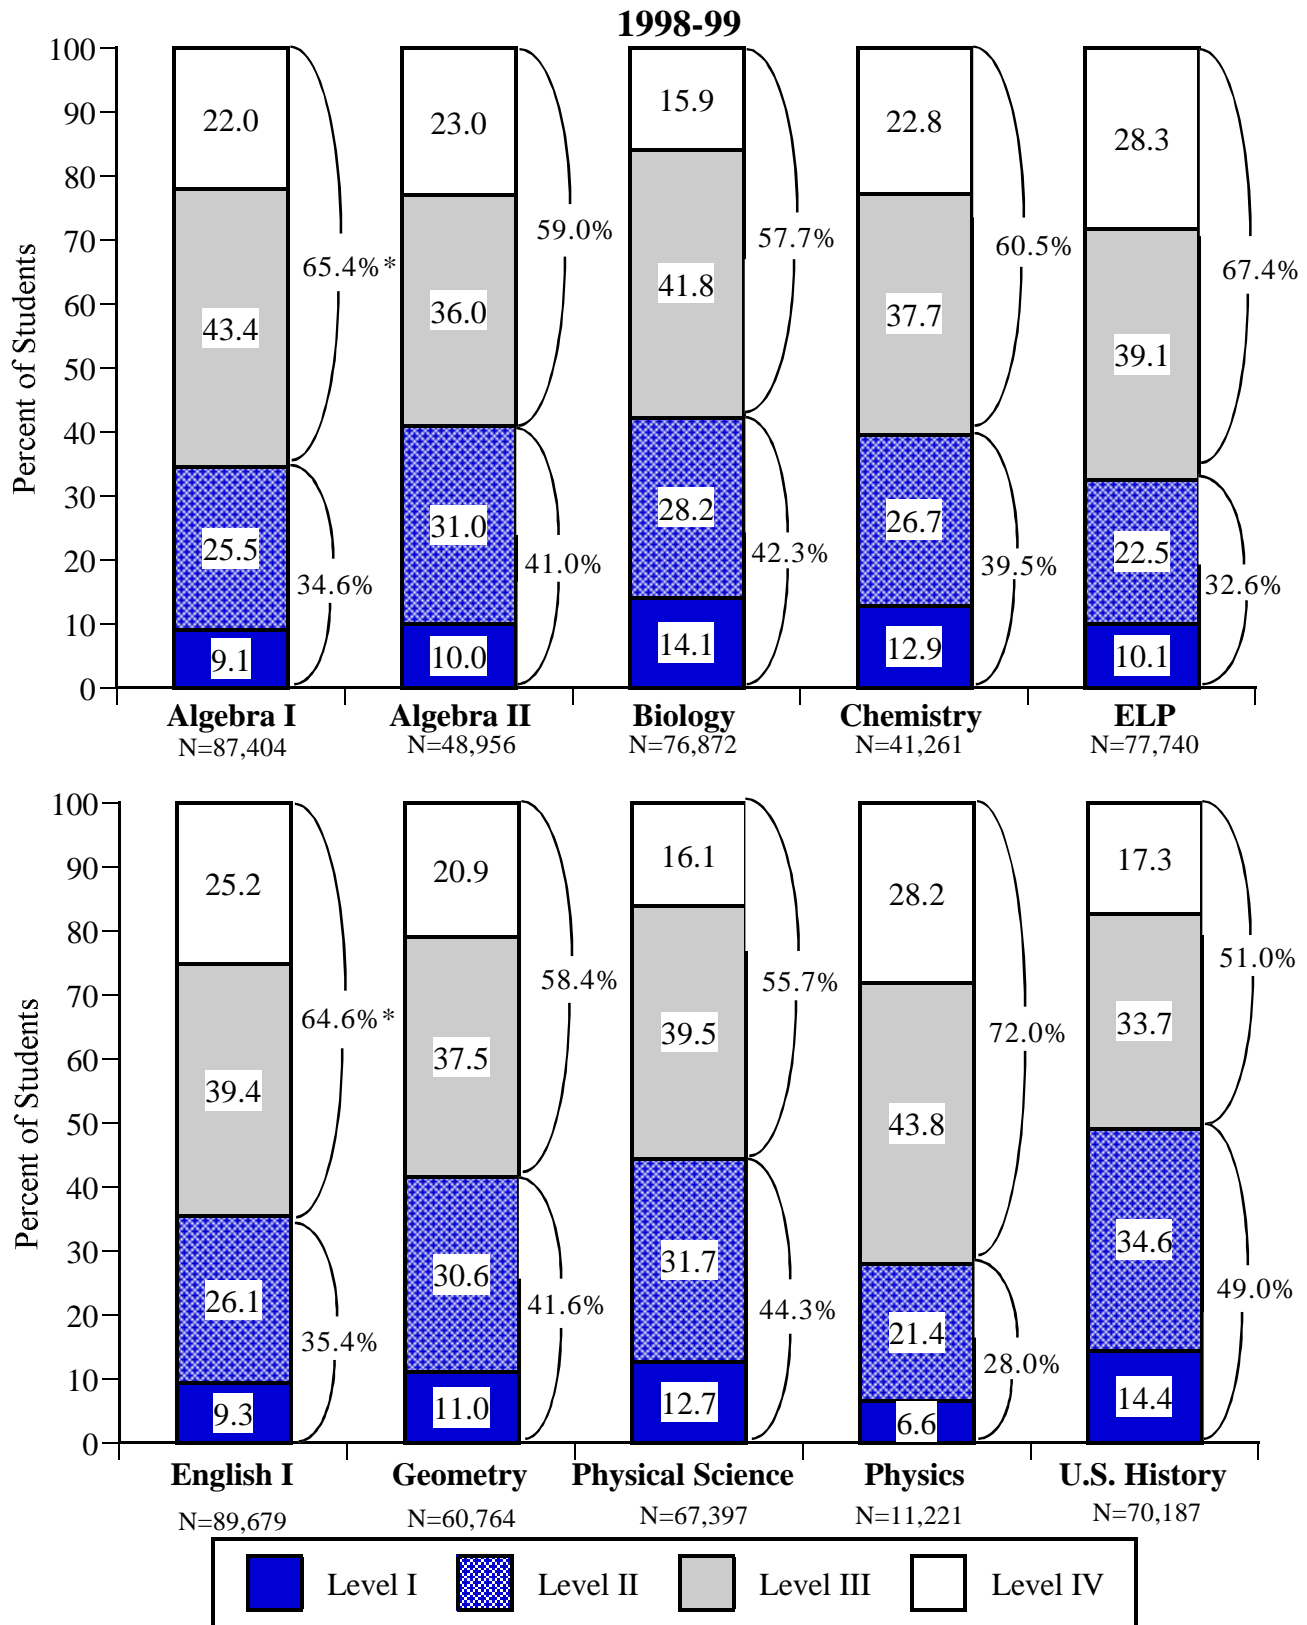

Notes: *Level I/II and Level III/IV percents are calculated based on actual N-counts and are not the sum of each percent.
 **Beginning in the 1998-99 school year, Algebra II, Chemistry, Geometry, Physical Science, and Physics were mandated statewide. Data for these tests are not available for 1994-95 through 1997-98.
 Due to rounding, data for some courses may not add to 100%.
 Data received from LEAs after October 15, 1999 are not included in these figures.

**Figure 15. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results
Percent of Students at Each Achievement Level in the Ten Core Courses**
(Algebra I, Algebra II, Biology, Chemistry, ELP, English I,
Geometry, Physical Science, Physics, and U.S. History) (continued)**

Notes: *Level I/II and Level III/IV percents are calculated based on actual N-counts and are not the sum of each percent.
 **Beginning in the 1998-99 school year, Algebra II, Chemistry, Geometry, Physical Science, and Physics were mandated statewide. Data for these tests are not available for 1994-95 through 1997-98.
 †Data for 1996-97 Algebra I and Biology reflect changes made after publication of the 1996-97 Report Card.
 Due to rounding, data for some courses may not add to 100%.
 Data received from LEAs after October 15, 1999 are not included in these figures.

Figure 15. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results
Percent of Students at Each Achievement Level in the Ten Core Courses**
 (Algebra I, Algebra II, Biology, Chemistry, ELP, English I,
 Geometry, Physical Science, Physics, and U.S. History) (continued)

Notes: *Level I/II and Level III/IV percents are calculated based on actual N-counts and are not the sum of each percent.
 **Beginning in the 1998-99 school year, Algebra II, Chemistry, Geometry, Physical Science, and Physics were mandated statewide. Data for these tests are not available for 1994-95 through 1997-98.
 Due to rounding, data for some courses may not add to 100%.
 Data received from LEAs after October 15, 1999 are not included in these figures.

Figure 16. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results

**Percent of Students at or Above Level III
by Course****

Figure 17. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results

Percent of Students at or Above Level III Across the Five Core Courses
(Algebra I, Biology, ELP, English I, and U.S. History)
for Black and White Students**

Notes: *Data for 1996-97 Algebra I and Biology reflect changes made after publication of the 1996-97 Report Card.
 **As of 1998-99, five additional courses were mandated. Since there is no data available from 1994-95 through 1997-98 for these five courses, they are not included in these figures.
 The inclusion of Black and White ethnic groups in this figure reflects their status as the largest ethnic groups in the state.
 N counts equal the number of students at or above level III across the five courses for 1998-99. Previous years are comparable.
 Data received from LEAs after October 15, 1999 are not included in these figures.

**Figure 18. 1994-95 to 1998-99 End-of-Course Multiple-Choice Test Results
