This Individual Student Report provides information on how your student performed on the recently administered NCEXTEND1 Grade 11 assessment. The score on this assessment is only one of the many indicators of how well your student is achieving. Test scores should always be considered along with all other available information provided about your student.

The NCEXTEND1 Grade 11 is a performance-based alternate assessment designed to assess students with significant cognitive disabilities. The NCEXTEND1 assessment items are grade-level performance items that measure the standards specified in the North Carolina Standard Course of Study Extended Content Standards. These Extended Content Standards are available for download at http://www.ncpublicschools.org/curriculum/ncecs.

**Column 1: Student’s Achievement Level Descriptor**
- The achievement level descriptor indicates what knowledge, skills, and abilities the student demonstrated based on his or her level of achievement on the test. A complete listing of the achievement level descriptions can be found at the North Carolina Department of Public Instruction/Accountability Services Division website at http://www.ncpublicschools.org/accountability/testing/shared/achievelevel.

**Column 2: Student’s Scores**
- There are 15 items (5 English language arts/reading items, 5 mathematics items, and 5 science items) on the NCEXTEND1 Grade 11 Alternate Assessment. Students are provided up to two opportunities to respond to each item, and items are scored on a 0–2 point scale. The number of questions the student answered correctly is reported as the total score. The students receive a combined score for English language arts/reading, mathematics, and science.
- There are five achievement levels reported (1, 2, 3, 4, and 5). The student is assigned an achievement level based on his or her total score.
- The achievement level indicates whether the student’s score is proficient (Yes) or not proficient (No). An achievement level of 3, 4, or 5 indicates that the student is proficient in the grade-level knowledge and skills assessed by the test. An achievement level of 1 or 2 indicates the student is not proficient in the grade-level knowledge and skills assessed by the test and will likely need academic support to be successful in these content areas in the future.

**Column 3: Total Score Comparisons**
- The row of achievement levels indicates the achievement level the student scored on the test and if the score is proficient (levels 3, 4, or 5) or not proficient (levels 1 or 2).
- The student bar shows the student’s total score compared to the total range of possible scores (0–30).
