

## **Transcript for Mitered Corner Video Clip**

Good morning, My name is Glenda Davis, and mine is Andi Brown and we are from Nash Central High School.

Allied Health Science II student Sam Perry is going to demonstrate how to put on a top sheet on using the mitered corners.

Sammy, go ahead...

I will make sure the smooth side is toward the patient. I am going to line up the top as the first step. I am going to smooth out the sheet making sure the middle of the sheet is lined up with the middle of the bed.

Now I am going to line up the foot of the bed down here...now I tuck the end of the bed in...I will put my hand on this corner and I will align dot to dot. I am going to tuck this in here in this corner...I am going to line this edge of the triangle up with the dotted line...I put my left hand here and pull this over and drop it down...now I make sure all the wrinkles are out of the bed and smooth for the patient. And that is the end of making the bed. Sammy did a great job. OK give it to her... (Clapping).
