CHARLOTTE-MECKLENBURG SCHOOLS
APPRENTICESHIP PROGRAM

Academic Credit

Summer: Apprentices may earn one (1) unit of elective credit working in a registered apprenticeship during the summer if they complete at least 135 hours of on-the-job training. Wage and hour forms and an employer evaluation must be turned in to the Apprenticeship Coordinator for the student to receive credit.

School Year: Apprentices may earn up to two (2) units of elective credit working in a registered apprenticeship during the school year if they complete at least 135 hours of on-the-job training per enrolled apprenticeship class. This applies both to students with release periods and to students enrolled in apprenticeship as a 9th/10th period. Wage and hour forms and quarterly employer evaluations must be turned in to the Apprenticeship Coordinator for the student to receive credit.

College Tech Prep

The first unit of credit received for apprenticeship will count as a capstone course in the College Tech Prep Course of Study. Subsequent units of credit for apprenticeship will count as general electives, but will not be considered as part of the four Career and Technical Education (CTE) courses required to successfully complete the College Tech Prep Course of Study.

Course Numbers

Course numbers for the first apprenticeship unit are listed below. This number should be used only one time for any individual student.

- Agricultural Apprenticeship 9959
