Public Schools of North Carolina
The aggregate total enrollment in K-12 systems (LEA, Charters, Private, Home schooling included) is determined by the size of the cumulative 13 years births cohorts combined with the amount of out of state born students. Based on Birth Census provided by DHHS and on the projections published by OSBM, the 13 years cumulative cohorts corresponding to fiscal years 2010 -2027 were computed for the chart below. The cohorts size steadily increase until 2016-17, after which the totals remain relatively constant.
