

We, the undersigned, pledge to focus our energies to take immediate action to ensure that our students have the necessary support to graduate from high school and refrain from dropping out.

Furthermore, we pledge that we will strive to work towards our benchmark goal of graduating at least ___% of our students from high school in the 2008-2009 academic year.

We are committed to preventing any student from making a “million dollar mistake”. Through our collaborative partnership we commit to making sure our communities and schools have the support structure needed to improve the graduation rate.
